Muhammad Younas

Portfolio - <https://muhammad-younas.netlify.app/> | Github - <https://github.com/YounasKhan2>

PROFESSIONAL SUMMARY

Full-stack Software Engineer with strong expertise in Flutter, Next.js, and scalable backend systems. Experienced in designing and deploying high-performance applications, integrating AI solutions, and leading end-to-end product development. Skilled at mentoring peers, optimizing system performance, and delivering secure, user-focused digital products at scale.

SKILLS

- **Core Expertise:** Software Architecture, Scalable Systems, OOP, DSA, AI Integration, State Management
- **Frontend:** Flutter, Next.js, React, Tailwind CSS, Java Swing
- **Backend:** Node.js, Express, REST APIs, PostgreSQL, MySQL, Firebase, Supabase
- **Cloud & DevOps:** Docker, Git/GitHub, CI/CD, Stripe Integration, Webhooks, Cloudinary, Deployment (Vercel, Railway, AWS basics)
- **Developer Tools:** Replit, Cursor
- **Collaboration:** Agile, Code Reviews, Mentorship

EDUCATION

BS SOFTWARE ENGINEERING

Superior University

Nov 2022 - present

Lahore

LANGUAGES

FLUTTER- PROJECTS

REALTIME CHAT APPLICATION

- Whatsapp like chatapp with firebase integration. Users can send text messages, current location, live location, and media
- Real time messaging with firebase
- Google authentication
- User profile management

<https://apk-drop.vercel.app/apks/app2>

NEWS AGGREGATION APP

- Realtime news updates
- Custom news categories
- Offline reading support
- Firebase integration
- REST APIs
- Admin panel
- Google authentication

<https://apk-drop.vercel.app/apks/app4>

Expense Tracker

- Expense and incoming tracking
- Realtime sync with features
- Dashboard with analytics charts
- FL_chart
- Firebase
- Google authentication

<https://apk-drop.vercel.app/apks/app1>

CINESTREAM

- Browse and search movies using YTS API
- Stream movie directly from services within the app
- Watch youtube trailers within the app
- Node.js Express backend server
- Firebase integration
- Google authentication

<https://apk-drop.vercel.app/apks/app3>

FULLSTACK- PROJECTS

PERSONAL PORTFOLIO

- Personal portfolio site
- Responsive design with dark-themed support
- Smooth page transitions
- Interactive UI elements
- Next.js, Tailwind CSS, Framer motion

<https://muhammad-younas.netlify.app/>

BLOGS WEBSITE

- Modern tech blog platform
- Advanced SEO with structured data
- Dynamic blog post pages
- AdSense
- Next.js, Typescript, Tailwind CSS, Content layer

<https://techblogspro.netlify.app/>

APK DROP

- APK discovery platform
- Detailed app pages with reviews
- Category based browsing
- AdSense
- Next.js, Tailwind CSS

<https://apk-drop.vercel.app/>

UNIT CONVERTER

- Next.js 15 with TypeScript and App Router architecture
- Server-Side Rendering (SSR) with static export optimization
- Progressive Web App (PWA) with offline functionality
- Mobile-first responsive design with Tailwind CSS
- Multi-source API architecture with fallback systems
- Real-time cryptocurrency data (CoinGecko, CoinCap APIs)
- Live currency exchange rates (ExchangeRate-API)
- Smart caching system (5-min crypto, 10-min fiat rates)
- Error handling & offline mode with cached fallbacks
- Google AdSense integration with strategic ad placements

<https://unithub-sand.vercel.app/>

AI – PROJECTS IN DEVELOPMENT

OFFLINE LLM CHATBOT

- Privacy first offline ai chatbot
- Local llm inference: runs llama and compatible models fully offline for privacy and low latency.

- Model management: load, quantize, and GGUF-format models.
- Flutter, Dart, C/C++, FFi

AI POWERED FULLSTACK- SAAS PROJECTS

TRY ROY – AI-Powered SaaS Learning & Transcription Platform

Led the design and development of a full-stack SaaS product integrating AI-powered transcription and learning tools. Built scalable architecture supporting multi-format transcription (PDF, DOCX, TXT) with <1s latency using AssemblyAI, OpenAI, and Deepgram APIs. Implemented subscription models with Stripe & Webhooks, optimized cloud storage with Cloudinary, and integrated AI-powered flashcards and quizzes for >5000 active users.

TECHS

- React, Typescript, Node.js, Express, Postgresql, Stripe Integration, Webhooks, Cloudinary, Google Authentication
- Assembly AI, Open AI, Gemini, Deepgram

OPEN SOURCE CONTRIBUTION

Urdu Sentiment Analysis (Web Vibe)

- **Role:** Contributor
- **Tech Stack:** Python, Fast API, Hugging Face Transformers, PyTorch
- **Key Contributions:**
 - Optimized model loading and quantization for low-resource environments
 - Improved API error handling and response serialization
 - Enhanced documentation and endpoint usability
 - Refactored preprocessing and batch inference logic

- **Impact:** Enabled efficient Urdu sentiment analysis, improved API reliability and user experience

<https://github.com/shamstabraiz1/WebVibe>

ACHIEVEMENTS & CONTRIBUTIONS

- Built and deployed **15+ professional projects** across web and mobile.
- Designed **scalable SaaS architecture** handling real-time AI transcription.
- Mentored peers on **Next.js, Flutter, and system design best practices**.
