Muhammad Younas

Portfolio - <https://muhammad-younas.me/> | GitHub - <https://github.com/YounasKhan2>

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 2+ years of experience designing, building, and deploying scalable, high-performance web applications. Proficient in Next.js, Mern, NestJS, and cloud infrastructure (AWS, Azure). Demonstrated expertise in architecting RESTful and microservices-based APIs, implementing state management with Redux, optimizing database performance using PostgreSQL, MongoDB, Prisma, Redis, and SQLite, and delivering robust CI/CD pipelines via Docker and Railway. Adept at leading cross-functional teams, conducting code reviews, and translating business requirements into production-ready software solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, C++, Java

Frontend: React.js, Next.js, Redux, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, RESTful APIs, GraphQL, Microservices Architecture, WebSockets, Webhooks

Databases: PostgreSQL, MongoDB, Redis, SQLite, Prisma ORM, Mongoose

Cloud & DevOps: AWS (EC2, S3, Lambda), Microsoft Azure, Docker, Vercel, Railway, GitHub Actions, CI/CD Pipelines

Tools & Practices: Git, GitHub, Agile/Scrum, Code Reviews, Debugging, Unit Testing, TDD, API Integration

Work Experience

Full Stack Web Developer - Preesoft

May 2024 - Present

- Architect and maintain RESTful and microservices-based back-end APIs using Node.js and NestJS, achieving 99.9% system uptime and ensuring high data integrity across production environments.
- Build and optimize responsive, high-performance user interfaces using Next.js, React, Redux, and Tailwind CSS, improving page load times by 35% and boosting user engagement.
- Design and manage relational and non-relational databases (PostgreSQL, MongoDB, Redis) with focus on query optimization, caching strategies, and data consistency.
- Refactor legacy codebases to modern TypeScript standards, reducing technical debt and improving application scalability by 40%.

- Integrate third-party services (payment gateways, authentication providers, analytics APIs) to enhance application functionality and user satisfaction.
- Lead code reviews and debugging sessions, enforcing best practices and driving a 30% reduction in post-deployment bugs.
- Collaborate with design and product teams in Agile sprints to deliver features on schedule and aligned with business objectives.
- Deploy and manage applications on AWS and Azure using Docker containers and Railway, ensuring seamless CI/CD workflows.

EDUCATION

BS SOFTWARE ENGINEERING
Superior University

Nov 2022 - present
Lahore
